WHAT IS AHEAD FOR YOU IN 1930? ~ See pages 2 and 3

WHAT *is* AHEAD...

These Points Vitally Affect Your Prosperity

1. In handling the J-M Line you are selling a *growing* line of profitable *allied materials*. When you sell one product, you have the opportunity to sell others, and they are *all* profitable.
2. This line is backed by a sound merchandising plan designed to assist you to move the material from your warehouse.
3. You have adequate provision for keeping a minimum stock, yet you are able at the same time to fill any orders from nearby supplies.
4. You have the full interest and co-operation of the J-M organization. J-M does not consider an item sold until it is on the consumer's building. And it is our purpose to do all within our power to help you sell our products to your customers.
5. Your selling effort is strengthened by the name, Johns-Manville, the recognized leader of the building material field.

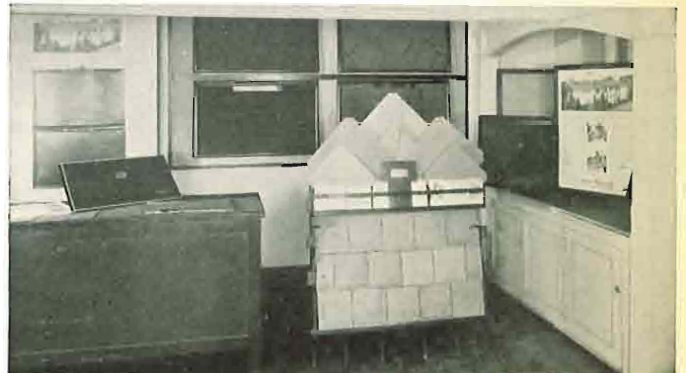

OUR expectations for the increased sale of J-M Building Materials in 1930 are based on the sound principle of greater co-operation with you—our dealer or distributor. We both face the new year with the same end in view—greater profits. Modern merchandising makes it impractical for the manufacturer and his selling organization to attempt to promote sales in any other way than through complete co-operation. Profit for you means profit for us—and because of the greater assistance which we plan to give you, we look for materially increased profits for us both.

You may well ask us then, "What are you going to do to help me sell your merchandise?" In answer to this challenge we present, at the top of the page, the five points upon which our sales program is built.

We confidently believe that these points represent valuable advantages in these days of keen competition—advantages that not only will

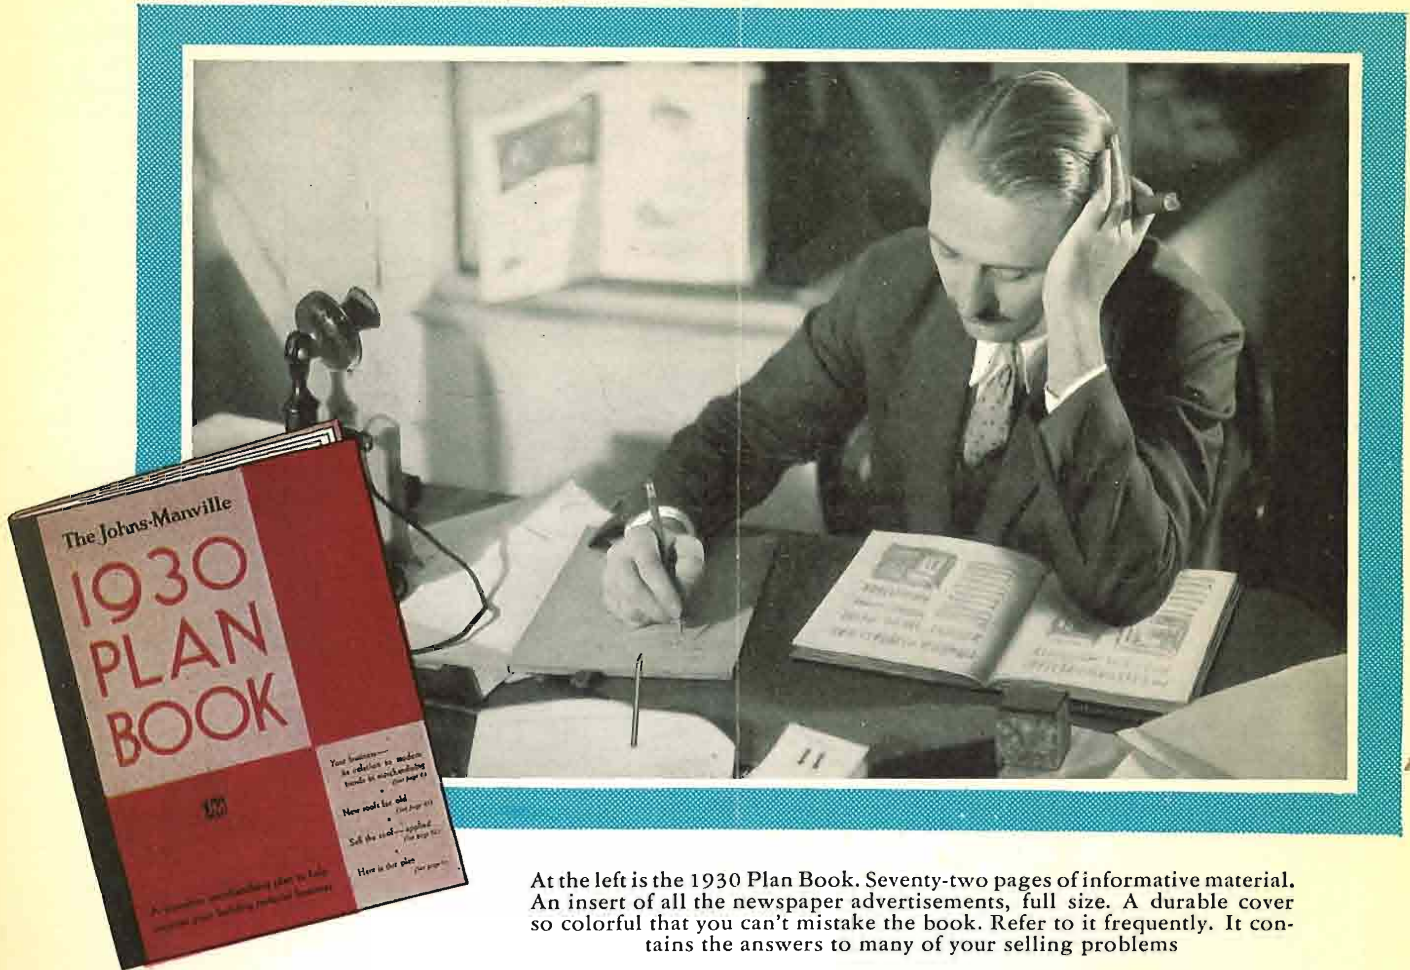

enable you to meet your selling problems, but to substantially increase your profits as well.

As a visible demonstration of this policy of greater co-operation, we shall shortly send you your copy of "The Johns-Manville 1930 Plan Book," which tells the details of the J-M Merchandising Plan, of what we are going to do, of what you should do to obtain its greatest benefits, and presents the various sales helps which have been prepared for your use.

Typical of the helpfulness of the new Plan Book is this illustration (taken from the Plan Book) of a new style display rack in a store display

... for You in 1930?

At the left is the 1930 Plan Book. Seventy-two pages of informative material. An insert of all the newspaper advertisements, full size. A durable cover so colorful that you can't mistake the book. Refer to it frequently. It contains the answers to many of your selling problems

Some of the titles will indicate the nature of the book:

Turning the Woman's Love of Beauty into Sales	Page 24
Getting the Architect to Create Prospects for You	Page 29
These Five Steps Make an Effective Sales Campaign	Page 32
What is the Value of Signs?	Page 34
The New Shingle Display Rack	Page 36
Suggested Ways to Use Booklets and Folders	Page 48
Newspaper Advertising	Page 50
Sell the Roof—Applied	Page 62
Telling the Celite Story to Concrete Users	Page 30
Some Points in Store Selling	Page 68

And an insert in which all the newspaper advertisements are shown in full size with suggested groups to be used as campaigns.

This book has been in preparation for months. Every page has behind it the experience of thousands of dealers and distributors who handle the J-M line. It is intended to be your reference book on salesmanship throughout the year.

Our mutual interest in expanding our respective businesses, plus J-M co-operation, together with your intelligent use of the Plan Book, should—and by all signs *will*—result in the attainment of our common goal—greater profits in 1930.

Watch for Your Copy of the

1930 PLAN BOOK

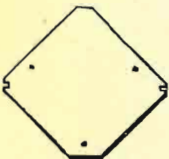

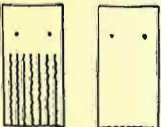

Johns-Manville Rigid Asbestos Shingles

Dutch Lap Shingle Prices *are REDUCED!*

WE are glad to announce that, effective January 1, 1930, the prices on all J-M No. 40 Dutch Lap Shingles will be reduced \$1.00 per square. The Mottled Gray now becomes \$6.50 per square in carload lots. (See page 4 for complete prices.)

This price reduction is made possible through the great volume of sales which has been built up largely through your efforts and our facilities for handling mass production.

Now you are able to sell the Dutch Lap Method

Mottled Gray

\$6.50 per sq.

F. O. B. FACTORY

Shingle, which simulates the American Method, at a price which should persuade the most reluctant prospect.

Beautiful roofs of solid colors can be laid with this type of shingle, or—as many have already found out—harmonizing blends can be created to suit the customer's individual preference.

This new low price at which the Dutch Lap Shingles are now available, will help make it easier for you to build up an even greater volume of sales during 1930.

One of the unlimited number of blends which can be created from the colors available in J-M Number 40 Dutch Laps

ONE OF THE MANY POSSIBLE COLORBLENDE EFFECTS

Here is a complete presentation of the Johns-Manville Rigid Asbestos Shingle line as it now stands.

The individual shingles are shown to illustrate the beautiful colors in which these fireproof, permanent and economical shingles are made. The blended groups show one of many combinations possible in each of the blended styles. Varying proportions of the colors will produce different effects, from which your prospects can make their selections.

NO. 1

1. The No. 5 Method Shingle butts aligned. Textured in Solid Red, Mottled Green, Mottled Gray, Mottled Blue-Black, and Cornwall would be

NO. 3

2. The No. 5 Method Shingle staggered butts. Shingles come in given at

NO. 5

3. The No. 70 Method Shingle have the advantage there is less of lost in laps at them the most of the J-M Shingles. Manufactured in Mottled Gray, Mottled Red, Mottled Blue-Black, Mottled Green, Solid Red—Rough Texture, and Green

4. The No. 60 Method Shingle available in the same No. 70 on spec

5. The No. 100 American Method Shingles. These shingles are 1/2" thick at the butt, beveled edges and most attractive shape. Available in Mottled Blue-Black, Solid Red, Mottled Gray, Mottled Green, and shades of Color

6. The No. 55 Shingles. In color they are the old weathered hewn wood, rough grandf

7. Dutch Lap Method Shingle. An adaptation of the economy of the Hexagonal Shingles to give the roof lines of the American Method Shingles. These are available in Mottled Gray, Mottled Red, Mottled Blue-black, Mulberry and Mottled Green

Customers*

The seven photographs in the center of the page give a complete picture of all the styles as they appear on the roof.

You will find this presentation of great value to you for your own reference and to show to your prospects. From the colors shown, and from the photographs of the roof decks, it will be easy for your customers to visualize how any colors and styles they may select will appear on their roofs.

Announcing J-M CHATEAU GREEN

The First of a Group of New Asphalt Shingle Colors

Richer, deeper, different from other greens. Furnished in Giant Individual, Giant Square Butt, Giant Hexagonal

AVAILABLE early in January, will be the new J-M Chateau Green Asphalt Shingle—the first of a series of shingles in new colors which are destined to repeat the success of Brittany Blend, Romany Reds, Normandy Greens and Fieldstone Green.

Chateau Green is an over-all color, composed of brilliant green slate, refined and enriched by a sprinkling of light green and sparkling black.

This new Chateau Green upholds the tradition of the J-M line for outstanding colors and quality materials, at a price within the range of every pocketbook. And the whole new group of colors and blends will make it easier for you to obtain an even greater part of your local Asphalt Shingle business during 1930. Ask the J-M salesman to show you a sample.

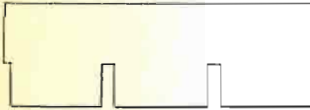

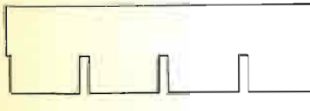

DUO-BLENDS

An entirely new effect in the J-M line. These shingles will consist of an attractive base color, with random dashes of harmonizing shades, making unusually soft and beautiful blends—a pleasing departure from the usual types of variegated shingles. They will be available about February 1, in various popular hexagonal patterns.

BLENDED ROMANY REDS IN MORE STYLES

The popularity of Blended Romany Reds has been so overwhelming that, in response to the urgent demands of our customers, we now will furnish this attractive color combination in 10-inch Square Butt Strips and 11½-inch Standard Hexagonal Strips. Ready January 1 at Waukegan and Manville.

Johns-Manville Slatekote Shingles

Transite Asbestos Wood

Made of Portland cement and asbestos fibre combined under heavy pressure. Suitable for exterior or interior use. Makes an unexcelled siding closely resembling stucco, especially when used in half-timbered residence construction. Because of its durability and fireproof qualities it is especially suited for the construction of garages and filling stations. Large quantities are also used for interior walls instead of plaster. In view of its many uses, you will find it advantageous to include Transite in your next shipment.

Standard size sheets: 36" x 48"; 42" x 48"; 42" x 96"
 42" x 96" not furnished in 1/8" thickness
 36" x 48" sheets standard at Nashua factory only
